About Us

Doelger Design Works is a premier metal fabrication studio specializing in furniture, table bases and custom pieces for commercial and residential furnishings. We believe in clean welds, elegant design, and producing the finest heirloom pieces for clients all over the Rocky Mountains. We enjoy collaborating with designers, builders, woodworkers, and homeowners to create incredible statement pieces that are fabricated with precision and detail. We pride ourselves in our high-touch collaborative approach, ensuring transparency and ease throughout the entire process.

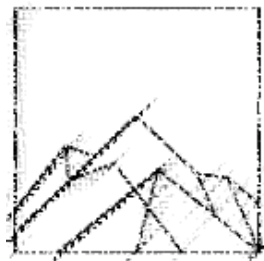

"I have been building stuff for as long as I can remember. I grew up surrounded by craftsmen, woodworkers, and shoestring inventors which helped me develop a passion and curiosity for working with my hands from an early age. Growing up in Northern New York provided a blank canvas for creativity – from building rafts and forts, all the way to outrageous custom mopeds. My passion for the outdoors and skiing brought me to Colorado after graduating with an engineering degree from RIT in Rochester, NY. I continued to build furniture and hone my metalworking skills; starting Doelger Design Works in 2017 with an exciting opportunity to produce the furniture for a new local brewery. Since then, we have been fortunate to work with incredibly talented builders, woodworkers, designers, and clients all throughout Colorado and beyond and we look forward to bringing our creations to your next project."

- Parker Doelger

Design and Fabrication Process

Our custom and semi-custom builds start with concept drawings and collaboration to identify potential design concepts. Once a concept is narrowed down, we will produce 3D CAD models to help visualize the finished product. From here, we finalize other details such as final fit, finish, fasteners, and any other detail. We fabricate all our pieces out of our shop here in Golden, Colorado. Our capabilities include MIG and TIG welding, plasma cutting, bending and forming, and light machining. Through our network of partners, we have access to laser cutting, bending, metal rolling, and powder coating.

Products and Services

Custom/ Semi-Custom Bases

We often tailor base design and size to your exact specifications. Since no two wood slabs are the same, we can custom-build our standard bases to a precise fit. We also fabricate full custom bases to your exact vision and offer design consultation and CAD modeling to hone the exact design.

Standard Table Bases

We offer a line of standard table bases to compliment your table top. Our timeless, elegant designs fit many design visions – ranging from rustic, industrial, contemporary, and modern.

Custom Metalwork

We love a good challenge and are always looking for opportunities to get creative. We are experienced in crafting various metal creations – from mantels, fireplace surrounds, signs, to lighting fixtures – bring us your ideas and we'll bring them to life.

Materials and Finishes

We offer various options for metal finish. Raw, unfinished options are also available.

Powder Coat – A tough, durable, and consistent finish. Available in many colors. A great option for a clean look. Suitable for indoor or outdoor applications.

Patina – A metal oxide process creates a natural metal coating, highlighting the natural grains and character of the steel. This results in a natural industrial blackened look. Also available in various colors for specialty applications. For indoor applications only.

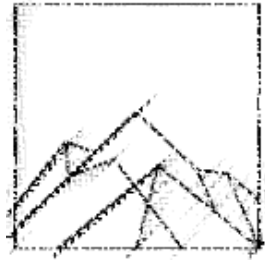

Clear Coat – Raw steel finished with clear coat sealant. This option will highlight the natural character of the unfinished steel. Steel will have marking, inconsistency, and variable coloring. A great option for the rustic/industrial look. For indoor applications only.

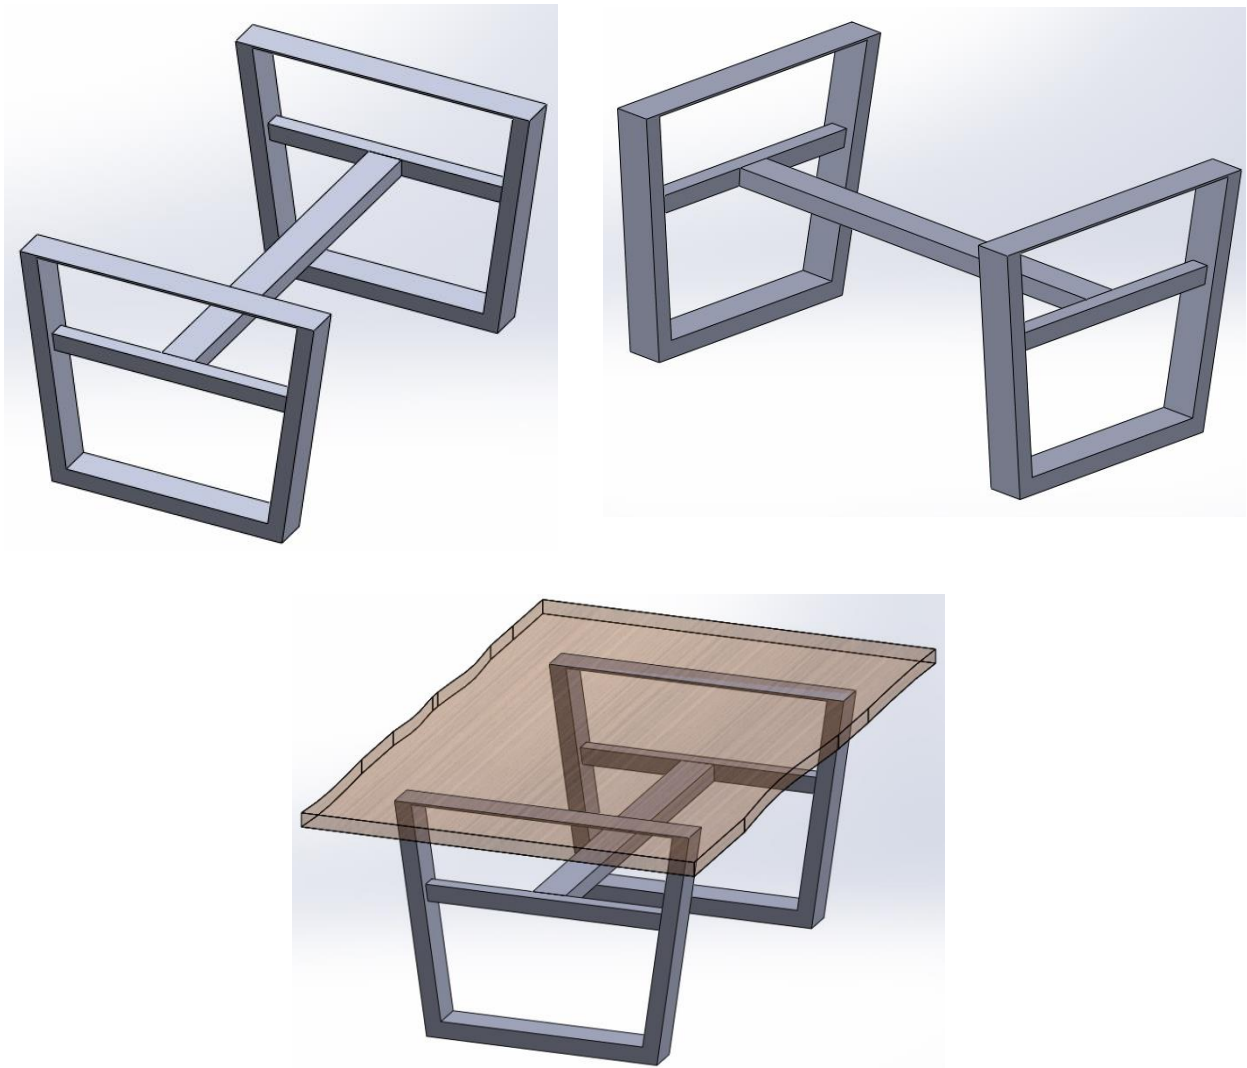

Custom and Semi-Custom Bases

We genuinely enjoy the challenge and creativity when it comes to our custom and semi-custom bases. We are passionate collaborators - Bring us photos of your inspiration, and we'll work our magic.

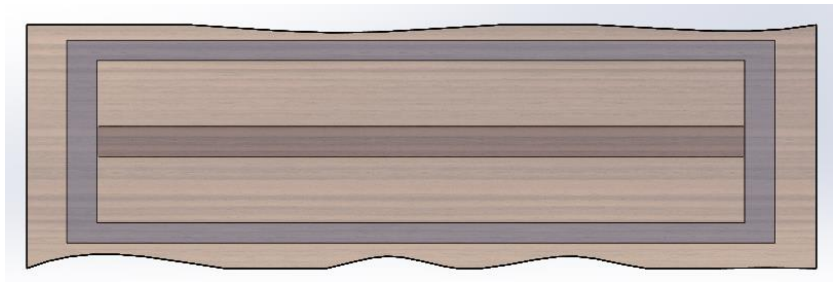

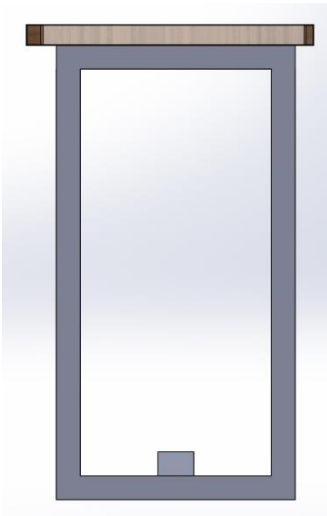

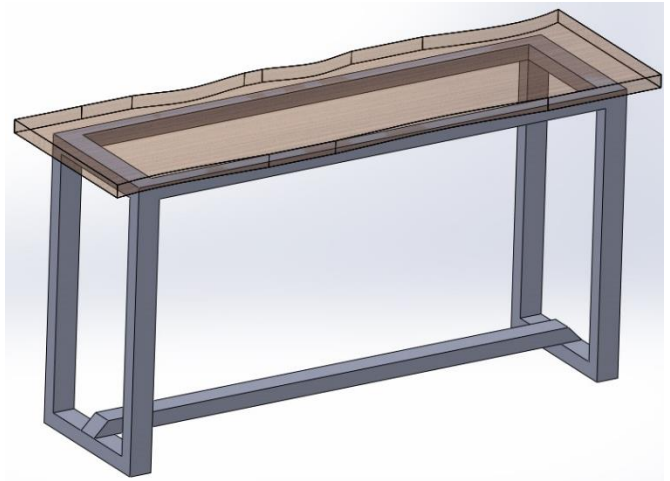

The Norwood

Norwood Description:

The Norwood style base is a great option for larger dining room tables. This base features a cross member that can be paired with a wood or metal spreader, adding structure and style. Available with 1"x3", 2"x3", or 2"x4" stock size.

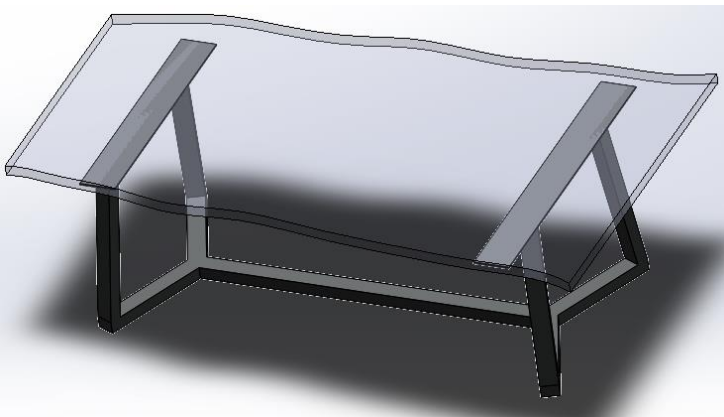

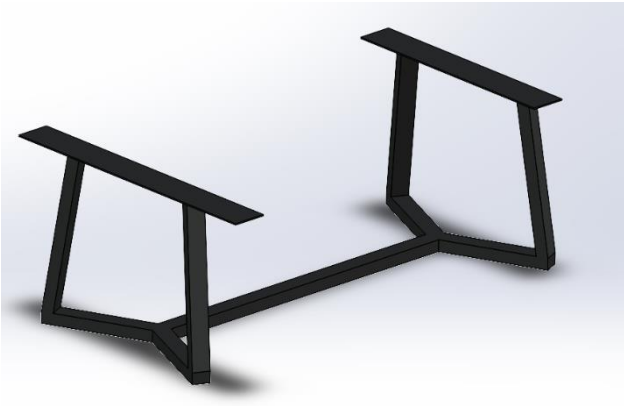

High-Top

High-Top Description:

The High-Top makes a great option for a counter or bar height table. The raised bottom spreader offers a comfortable footrest. 1.5" or 2" square tubing adds to the industrial look.

Saint Lawrence

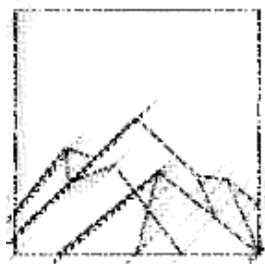

St. Lawrence Description:

The St. Lawrence is a definite statement piece that combines function and style. Angled and splayed legs add dimension and character. Ideal for large dining room tables.

Standard Bases

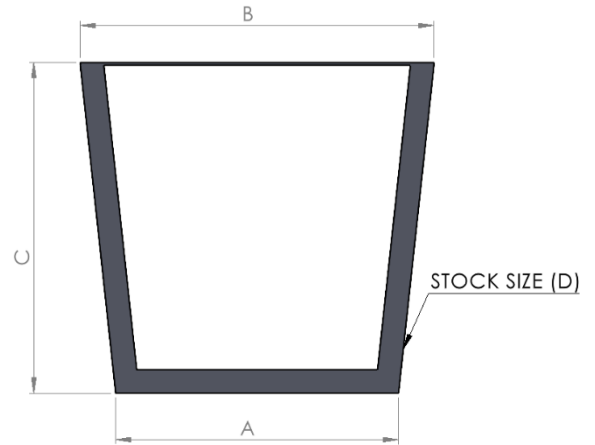

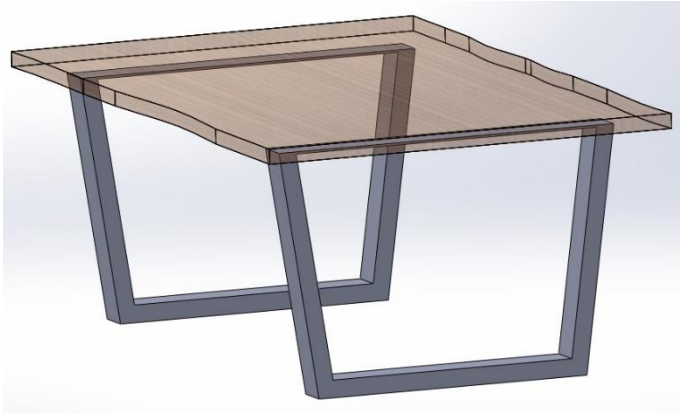

We have a wide selection of high quality, economical, and stylish standard bases. These are available in different configurations. If you don't see the exact configuration you're looking for, reach out to discuss customization possibilities.

Standard Base - Arapahoe

Classic trapezoid legs work with many different styles of tables. Industrial feel with some modern styling pairs well with live edge slabs. Perfect for small-medium dining room tables, coffee tables, side tables, or benches.

Includes 3/8" mounting holes for slab/tabletop attachment.

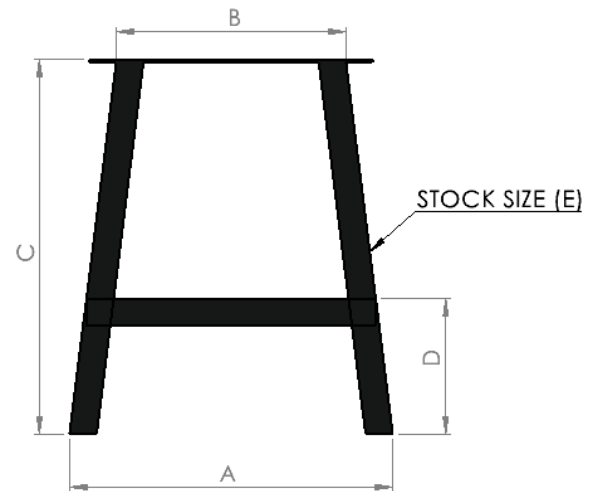

Application	Slab Width	A	B	C	D	Finishes Available	Part Number
Dining tables, desks	36"-42"	24"	30"	28"	2"x3"	Powder coat, Patina, Clear coat	ARAP24-30-2
